

PROTECT NEW YORK'S FORESTS & COMMUNITIES
Stop the Asian Longhorned Beetle

If you think
you have found an
Asian Longhorned Beetle,
please call
877 STOP-ALB

**DONT MOVE
FIREWOOD**
dontmovefirewood.org

Exotic insects and diseases are a major threat to trees, forests, and wildlife habitat. Tree-killing species like emerald ash borer and Asian longhorned beetle can't move far on their own, but they can jump hundreds of miles when people move firewood.

To protect New York's trees and landscapes

- Learn how to identify forest pests
- Inspect trees on your property for damage
- Report suspicious findings
- If you need firewood, buy it locally

New York has small, isolated infestations of several invasive forest pests. Don't let these infestations spread- don't move firewood.
